The students, who are appearing for CBSE Class 10th and 12th exams are nervous. If you can master the technique of applying conversion factors, you will be able to solve a large variety of problems. Our aim is to help students learn subjects like physics, maths and science for students in school college and those preparing for competitive exams.

Formulas and equations are far easier to understand once written down and the study of chemistry can involve numbers that are very large. It would be nice to collect these lists in an appendix so that you don't have to keep flipping through the book to find the information.
